

Shhhh!

It's not a secret anymore!

Make some noise for *Air Digital*, the new album from [Shhhh!](#) out May 8th, 2026!
Through grief and static, through 8-bit worlds and analog ghosts — *Air Digital* finds the sound you never knew you were looking for.

Air Digital has musical influences in retro-synth, new-age, electro and pop.

It's the story of a being who enters chaos: grief, loss, the noise of the world and of their own mind, and instead of trying to escape, learns to move through it.
Childhood as an anchor... Creativity as an uncontrollable and sacred force.
At the end: alignment. The chosen silence after the cry.

Singles include:

Into - Ange - All Be Done - Elle Belle - Hush - Xenophobia - Obliterate Me - Godlike - Hush No More - Out

Shhhh! was officially born three years ago, as a musical project to explore the boundaries of music creation using modern tools. For years I have helped other artists find their voice, yet my own voice remained silent... the need to find my own became impossible to ignore. The name **Shhhh!** reflects this paradox of being silently influential.

Shhhh! is rooted in Montreal, where the music scene is very diverse. This melting pot is crucial to the style: resulting in a musical fusion as diverse as its multicultural influence. You can find previous album *Hits*, and singles *Mes Mains Tremblent*, *Easy Christmas*, and *He Was* already released, and on our [media drive](#).

Shhhh! embraces contradictions: the name itself suggests asking for silence (Shhhh) loudly (!). The avatar, the frontman, is *The Shimp* (often referred to as "The Shhhhimp"): a man wearing a chimp mask, symbolizing the tension between anonymity and desire for recognition, the human creativity often bound to the performing chimp — **silent yet loud, faceless yet in the spotlight.**
